

Software Carpentry

When you arrive...

- Please fill in the pre-assessment workshop survey if you haven't already

<https://goo.gl/ZnUs6X>

- Go to the shared Etherpad, follow the set up instructions

<https://goo.gl/miobce>

Software Carpentry

Southampton

April 12-13 2018

Chris Cave-Ayland, Steve Crouch, James Graham, Alice Harpole, Sam Mangham, Tomás Muller-Bravo, John Robinson

@SWCarpentry @RSGSoton

Housekeeping

- No fire drills today!
 - Evacuation route: Leave room via rear exit, turn right, go downstairs. Assemble in car park.
- Toilets: Rear exit into corridor
 - Female → Left
 - Male → Right

Who are we and why are we here?

Researchers who write software!

- Whose main job isn't producing code/software?
- Who writes software to support research?
- Who would find it impractical or impossible to do their main job without writing software?

We should care about software!

We should care about software!

We want to set you on the road to writing **Sustainable Software**

We should care about software!

The take-home message is:

(This is the Software Sustainability Institute motto and I stole it)

We should care about software!

- “Teaching researchers the computing skills they need to get more done in less time and with less pain”
- 27,000 + Researchers taught since 1998 in 35 Countries
- Materials are freely reusable (CC-BY license)

Who are we?

To help you learninate...

John Robinson

Research Software Group

- We help to improve software developed by researchers at Southampton
 - **Provide skilled Research Software Engineers**
 - **Software development skills training**
- Led by Simon Hettrick & John Robinson
- rsg-info@soton.ac.uk / @RSGSoton
- <http://rsg.soton.ac.uk>

Software Sustainability Institute

Cultivate world-class research with software

What are we going to learn?

Automation

- Bash Shell
- Not just about learning commands
- Learning just a few things can make a huge difference

Python

- Beyond syntax...
- How to build programs step-by-step
- Comprehensive, reusable, testable

Image Charles Kenny

[CC-BY-SA](#)

Version Control

- Git
- How has this code changed?
- Who made this change?
- Which version of this code was used to generate this result?
- It's the **reproducibility**, stupid

Agenda Day 1

- | | |
|----------------------|---|
| 10:00-12:30 | Automating tasks with the Bash shell |
| <i>Alice (Chris)</i> | 11:00-11:30 Break |
| | |
| 12:30-13:30 | Lunch |
| | |
| 13:30-16:00 | Building programs with Python I |
| <i>James (Steve)</i> | 14:30-15:00 Break |
| | |
| 16:00-16:30 | Wrap-up |

Agenda Day 2

10:00-12:30	Building programs with Python II
<i>Sam (Steve)</i>	11:00-11:30 Break
12:30-13:30	Lunch
13:30-16:00	Version control with Git
<i>Tomás (John)</i>	14:30-15:00 Break
16:00-16:30	Wrap-up

Some final words...

Code of Conduct

- <http://software-carpentry.org/conduct/>

Code of Conduct

Software Carpentry workshops are community events intended for networking and collaboration as well as learning. We value the participation of every member of the scientific community and want all attendees to have an enjoyable and fulfilling experience. Accordingly, all attendees are expected to show respect and courtesy to other attendees throughout the workshop. The same standards of behaviour are expected in Software Carpentry spaces online.

To make clear what is expected, everyone taking part in Software Carpentry events and discussions—*instructors, helpers, organizers, and learners*—is required to conform to the following Code of Conduct. Organizers will enforce this code throughout events, but you may also contact us directly by email at admin@software-carpentry.org. All communication will be treated as confidential.

Code of Conduct

Software Carpentry is dedicated to providing a harassment-free experience for everyone, regardless of gender, sexual orientation, disability, physical appearance, body size, race, nationality, religion, or choice of text editor. We do not tolerate harassment of participants in any form.

1. Harassment includes offensive verbal or written comments related to gender, sexual orientation, disability, physical appearance, body size, race, or religion, sexual images in public spaces, deliberate intimidation, stalking, following, harassing photography or recording, sustained disruption of talks or other events, inappropriate physical contact, and unwelcome sexual attention.
2. All communication should be appropriate for a professional audience including people of many different backgrounds. Sexual language and imagery is not appropriate for any event.
3. Be kind to others. Do not insult or put down other participants.
4. Behave professionally. Remember that harassment and sexist, racist, or exclusionary jokes are not appropriate.

Participants asked to stop any harassing behavior are expected to comply immediately. People violating these rules may be asked to leave the event or be excluded from the online venue at the sole discretion of the organizers, without a refund of any charge that may have been levied.

Thank you for helping make this a welcoming, friendly event for all.

This code of conduct is a modified version of that used by PyCon, which in turn is forked from a template written by the Ada Initiative and hosted on the Geek Feminism Wiki.

That's all from me...

*Louie, I think this is the beginning of
a beautiful friendship*

...but for you, just the beginning!

Software Carpentry Day 2

When you arrive...

- Please check you can do the following...
- Open the Python interpreter from a terminal, as we did yesterday, and type...

\$ python

- And type at the >>> prompt...

>>> import numpy

>>> import matplotlib

- If you encounter any errors, please seek a helper to help you out
